Why Choose Us

QUALITY AND VALUE

RealExamFree Practice Exams are written to the highest standards of technical accuracy, using only certified subject matter experts and published authors for development - no all dumps.

TESTED AND APPROVED

We are committed to the process of vendor and third party approvals. We believe professionals and executives alike deserve the confidence of quality coverage these authorizations provide.

EASY TO PASS

If you prepare for the exams using our RealExamFree testing engine, It is easy to succeed for all certifications in the first attempt. You don't have to deal with all dumps or any free torrent / rapidshare all stuff.

TRY BEFORE BUY

RealExamFree offers free demo of each product. You can check out the interface, question quality and usability of our practice exams before you decide to buy.

Customer Reviews

I wasted a lot of money and failed twice. Thanks to HPE0-J78 exam collection I pass now.

Noel

realexamfree is a reliable company. I pass exam at first shot. Many thanks

Julie

Pass BIMF.EN successfully. Really good dumps. It saves me a lot of time. Wonderful!

Ahern

online test engine is very useful for me, because i could practice the C-TERP10-67 question dumps in my phone when i was waiting or on the bus even without internet, i could make the most of my time. Last week, i passed the C-TERP10-67. so i want to share the realexamfree with you guys. hope you will get a good result in test.

Carl

Title : Fundamentals of Enterprise
Solut.Using IBM Tivoli Strg 2008

Vendors : IBM

Version : DEMO

NO.1 What is required to identify valid participants for an introductory meeting?

- A. organization address book, including pictures
- B. organization mailing list showing the exact locations where each employee is working
- C. organization chart showing the line relationship between the CIO and the subordinate storage group
- D. organization chart showing the lateral relationship between the CIO and the subordinate storage administrator

Answer: C

NO.2 What information is relevant when creating a customer's baseline documentation as input to a storage solution design?

- A. biggest risk factors
- B. IBM solution differentiators
- C. business benefits provided by the solution
- D. IT organizational structure diagram and description

Answer: D

NO.3 A business has ten servers that are critical and must be restorable at the disaster recovery site. Which three components must be considered in the disaster recovery site to implement this request? (Choose three.)

- A. SLAs
- B. availability of HBAs
- C. IP network speed at the disaster site
- D. backup and restore media infrastructure
- E. amount of incremental data on the client
- F. network speed from disaster site to primary site

Answer: ACD

NO.4 The customer has a strong compliance requirement for data encryption on network and off-site

locations. Which two practices should be recommended to this customer? (Choose two.)

- A. make sure all data are classified
- B. make sure that production data are properly classified
- C. propose encryption solutions according to company policies

- D. make sure that IBM Tivoli Storage Manager pools are configured for encryption
- E. use the GSS-API provided by Tivoli products and integrate with network components

Answer: BC

NO.5 A customer plans to renew their storage infrastructure to cope with performance and availability requirements stated by IT management and business drivers. Which solution should be recommended to this customer?

- A. SAN Volume Controller
- B. Bare Machine Recovery
- C. Tivoli Enterprise Console
- D. IBM Tivoli Storage Manager

Answer: A

NO.6 What is required in order to back up a customer critical files?

- A. IBM Tivoli Storage Manager for SANs
- B. IBM TSM Hierarchical Storage Manager (HSM) on Windows
- C. IBM Tivoli Storage Manager for System Backup and Recovery
- D. Open File Support with IBM Tivoli Storage Manager Extended Edition

Answer: D

NO.7 During the planning and inventory phase of the consulting process, which two topics are part of the document describing the customer's current storage environment (baseline)? (Choose two.)

- A. return on investment (ROI) analysis
- B. customer's storage hardware assets
- C. customer's long term business vision
- D. customer's IT processes related to storage
- E. mapping of IBM storage solutions that meet customer's needs

Answer: BD

NO.8 What are two benefits of mapping the customer business processes to the storage environment in the baseline gathering stage? (Choose two.)

- A. identifies waste
- B. describes costs clearly
- C. provides audit-ready posture

- D. defines steps and sequences
- E. defines customer requirements

Answer: AD

NO.9 Which IBM TotalStorage Productivity Center host system is limited to 500 threads?

- A. AIX
- B. Linux
- C. HP-UX
- D. Windows

Answer: D

NO.10 Which information should a customer baseline document include?

- A. analysis of customer's data management maturity level
- B. analysis of all data loss exposures that the customer currently faces
- C. configuration logs showing customer data structure for applications and databases
- D. names and phone numbers of everyone that needs to be contacted during the current customer engagement

Answer: D

NO.11 Which key business process is most necessary to understand in order to describe SLAs as they relate to storage?

- A. audit procedures
- B. hardware provisioning
- C. customer service handling
- D. maintenance and support services

Answer: B

NO.12 A storage administrator has allocated a LUN from a DS/8000 to an AIX server. IBM TotalStorage Productivity Center indicates that the AIX server has unallocated disk space. Which process has not been completed by the UNIX administrator?

- A. define a filesystem
- B. run config manager
- C. zone the LUN to the server
- D. enable the HBA on the server

Answer: A

NO.13 Which server component acts as a traffic controller by directing information and handling requests from the agent?

- A. TotalStorage Productivity Center for Data
- B. TotalStorage Productivity Center for Disk
- C. TotalStorage Productivity Center Basic Edition
- D. TotalStorage Productivity Center for Replication

Answer: A

NO.14 Which two processes should be in place for a successful data management initiative? (Choose two.)

- A. data security
- B. data replication
- C. data provisioning
- D. change management
- E. incident management

Answer: AB
