Why Choose Us

QUALITY AND VALUE

RealExamFree Practice Exams are written to the highest standards of technical accuracy, using only certified subject matter experts and published authors for development - no all dumps.

TESTED AND APPROVED

We are committed to the process of vendor and third party approvals. We believe professionals and executives alike deserve the confidence of quality coverage these authorizations provide.

EASY TO PASS

If you prepare for the exams using our RealExamFree testing engine, It is easy to succeed for all certifications in the first attempt. You don't have to deal with all dumps or any free torrent / rapidshare all stuff.

TRY BEFORE BUY

RealExamFree offers free demo of each product. You can check out the interface, question quality and usability of our practice exams before you decide to buy.

Customer Reviews

I wasted a lot of money and failed twice. Thanks to HPE0-J78 exam collection I pass now.

Noel

realexamfree is a reliable company. I pass exam at first shot. Many thanks

Julie

Pass BIMF.EN successfully. Really good dumps. It saves me a lot of time. Wonderful!

Ahern

online test engine is very useful for me, because i could practice the C-TERP10-67 question dumps in my phone when i was waiting or on the bus even without internet, i could make the most of my time. Last week, i passed the C-TERP10-67. so i want to share the realexamfree with you guys. hope you will get a good result in test.

Carl

Exam : 646-588

Title : Advanced Wireless LAN for Account Managers

Vendors : Cisco

Version : DEMO

NO.1 The CIO of a digital public-advertising provider wants to deploy a wireless solution at the corporate headquarters. The wireless solution is for the floor where the company holds press conferences and multimedia corporate meetings. The CIO wants a virtual office for corporate guests that enhances the entertainment experience without creating security issues. Which response assures the CIO that

unauthorized wireless access points will not be on the network?

A. Cisco is a member of the Wi-Fi Alliance. By enabling Wired Equivalent Privacy keys in a Cisco Unified

Wireless Network to encrypt the payload of packets sent, it is almost impossible for hackers to get into the

network. If someone gains unauthorized access, the reporting features in the access point will notify IT

managers when access points or devices fail authentication.

B. A Cisco Unified Wireless Network has integrated security. Radio management features continuously

monitor the radio environment, detect interference and rogue access points, and alert the WLAN

administrator to radio network changes. The Cisco location server can map the location of thousands of

Wi-Fi clients for IT management and high-value asset tracking. It enforces security policies by identifying

and locating rogue access points and devices.

C. Building a Self-Defending Network is key for a wireless solution. Only with the Cisco Network

Admission Control Framework can organizations analyze and control all devices on the network. It

ensures that every endpoint device complies with corporate security policy and is running the latest and

most relevant security protections.

D. Issues with network security always exist. Because IEEE 802.11i standards call for a one-way,

device-centric form of authentication, it is inherently flawed. To ensure network security, use powerful,

world-class network management features with a Cisco Unified Wireless Network. There is better visibility

and control of the air space, as well as the ability to consolidate functionality into a single management system.

Answer: B

NO.2 Which three features supported by the Cisco 802.11 WLAN directly benefit the healthcare industry?

(Choose three.)

- A. access to accurate patient identification and treatment history from every room
- B. computerized physician order entry, staff monitoring, and communication from floor to floor
- C. effective scheduling of labor, parts, and asset downtime to increase technician productivity
- D. option to increase revenue by renting out equipment or charging for Internet use
- E. up-to-the-minute tracking of supplies, equipment, personnel, and patients
- F. radio frequency identification based inventory management

Answer: ABE

NO.3 Which feature makes competitor products vulnerable to various security attacks?

- A. FIPS 140-2 compliance
- B. support for only the basic Wired Equivalent Privacy
- C. support for Triple Data Encryption Standard, media interface connectors, and other security features
- D. user-based identification

Answer: B

NO.4 WLAN solutions extend wired networks for in-building and on-campus mobile workers. This enhanced

network access directly enables a company to increase which three areas? (Choose three.)

- A. billing accuracy
- B. group collaboration
- C. productivity
- D. responsiveness to customers
- E. shareholder trust
- F. ROI

Answer: BCD

NO.5 Which two are key differentiators that give Cisco wireless mesh outdoor products a competitive

advantage over competitor offerings? (Choose two.)

- A. Cisco wireless mesh outdoor products deliver mission-critical Wi-Fi access.

- B. Cisco wireless mesh outdoor products provide mesh security at each step.
- C. Cisco wireless mesh outdoor products only support Wired Equivalent Privacy.
- D. Cisco wireless mesh outdoor products use their own wireless standards.

Answer: AB

NO.6 Which three benefits impact manufacturers that are adopting Cisco WLAN solutions?
(Choose three.)

- A. safer workplace conditions
- B. networked supply-chain management
- C. less paperwork
- D. increased network security
- E. minimal operational downtime
- F. mobility with wireless laptop carts

Answer: BCE

NO.7 When implementing a WLAN for healthcare markets, which three benefits will increase the return on investment? (Choose three.)

- A. Wireless connectivity improves the speed of patient check-in and check-out.
- B. Bandwidth and QoS are primary considerations for healthcare markets.
- C. Secure Cisco WLANs allow staff to access medical records while roaming throughout the campus.
- D. Wireless LANs can provide rogue detection and containment.
- E. WLAN controllers provide secure connectivity to ensure the integrity of patient medical records.
- F. Wireless LANs can reduce the cost and increase the quality of patient bedside care.

Answer: ACF

NO.8 What are the three best responses to a director of a healthcare facility whose primary concern is mitigating risks, such as medical record errors, malpractice suits, and poor bedside care?
(Choose three.)

- A. A Cisco WLAN enables real-time tracking of important equipment, supplies, and key personnel.
- B. A Cisco WLAN minimizes the risk of errors by automating tracking of medications, supplies, and personnel.
- C. A Cisco WLAN can extend to each patient room, allowing tracking of patient information at

the bedside

at all times.

D. A Cisco WLAN enables patient medication to be tracked at the bedside, which minimizes the risk of

errors in dosage or identification.

E. A Cisco WLAN can be used to monitor vital signs in each patient room. This would reduce the cost and

time of manual tracking.

F. A Cisco WLAN can ensure secure intrusion protection throughout the hospital campus.

Answer: BCD

NO.9 Which tool helps program participants differentiate their wireless client devices and ensures that these

devices are IEEE 802.11 and Wi-Fi compliant?

A. Steps to Success

B. Cisco Catalyst Online Power Calculator

C. Software Advisor

D. Cisco Compatible Extensions

Answer: D

NO.10 Which technology is a centralized, systems-level application for managing and controlling an entire

Cisco WLAN infrastructure?

A. CiscoWorks WLSE

B. Wireless Domain Services

C. Cisco Secure Access Control Server

D. Cisco Security Monitoring, Analysis and Response System

Answer: A
