Why Choose Us

QUALITY AND VALUE

RealExamFree Practice Exams are written to the highest standards of technical accuracy, using only certified subject matter experts and published authors for development - no all dumps.

TESTED AND APPROVED

We are committed to the process of vendor and third party approvals. We believe professionals and executives alike deserve the confidence of quality coverage these authorizations provide.

EASY TO PASS

If you prepare for the exams using our RealExamFree testing engine, It is easy to succeed for all certifications in the first attempt. You don't have to deal with all dumps or any free torrent / rapidshare all stuff.

TRY BEFORE BUY

RealExamFree offers free demo of each product. You can check out the interface, question quality and usability of our practice exams before you decide to buy.

Customer Reviews

I wasted a lot of money and failed twice. Thanks to HPE0-J78 exam collection I pass now.

Noel

realexamfree is a reliable company. I pass exam at first shot. Many thanks

Julie

Pass BIMF.EN successfully. Really good dumps. It saves me a lot of time. Wonderful!

Ahern

online test engine is very useful for me, because i could practice the C-TERP10-67 question dumps in my phone when i was waiting or on the bus even without internet, i could make the most of my time. Last week, i passed the C-TERP10-67. so i want to share the realexamfree with you guys. hope you will get a good result in test.

Carl

Exam : **EGMA105**

Title : Enterprise Geodata
Management Associate 10.5

Vendor : Esri

Version : DEMO

NO.1 Who is the only user that can run the Create Role geoprocessing tool?

- A. Data editor
- B. Geodatabase administrator
- C. Data creator
- D. Database administrator

Answer: D

NO.2 An administrator runs a nightly compares on a versioned geodatabase. In the morning the administrator checks the compares _ log and sees it is unsuccessful, but the number of state did NOT decrease. All users are working on the DEFAULT version and tend to run geoprocessing tools overnight.

Why is the compress NOT removing any state?

- A. The connected map sessions are locking state.
- B. The administrator needs INSERT and DELETE permission on the compress_log
- C. The connected map sessions are locking the compress_log
- D. The administration needs INSERT, UPDATE and DELETE permission on the state table.

Answer: B

NO.3 Which option will improve performance when drawing a map full extent?

- A. Scale dependency
- B. Attribute index
- C. Relationships
- D. Spatial index

Answer: B

NO.4 A data creator user wants to create a copy of a feature class schema in a different projection. Which workflow supports these requirements?

- A. Copy and paste the feature class and change the configuration keyword
- B. Use export schema only in a workspace document
- C. Use the Simple Data Loader
- D. Use a template feature class while creating the new feature class

Answer: D

NO.5 An ArcGIS user is trying to connect to an enterprise geodatabase. The map document that the ArcGIS user is working on contains a map service from the same geodatabase. The map service layer fails to display properly.

What would explain this behavior?

- A. The database connection used had the incorrect password
- B. The service has NOT been refreshed
- C. The user was granted Read access to the wrong OS folder.
- D. The SELECT privilege for the user was revoked

Answer: C

NO.6 Which user in the geodatabase can register an object as versioned?

- A. A user who owns a transaction version
- B. A user who owns the data
- C. A user with edit permissions on the object
- D. A user with administrator privileges in the geodatabase

Answer: A

NO.7 A company needs to store its data in an Esri geodatabase. The GIS analysts at the company will NOT edit the same feature database or feature classes simultaneously. The analysts want the ability to undo redo. The company estimates it will need less than 10 GB of storage space hold its data. The solution must be as cost efficient as possible.

Which geodatabase type fits the company needs?

- A. Enterprise
- B. File
- C. Personal
- D. Workgroup

Answer: A

NO.8 A two-way replica successfully created in ArcMap using the default options. When the replica was synchronized from child parent, some of the edits on the child replica were transferred to the parent, but some edits were NOT.

What caused this problem?

- A. The feature class being replicated did NOT have Global IDs.
- B. The replica should have been created using the Full model.
- C. The child geodatabase was NOT compressed prior to synchronization
- D. The missing features were outside of the extent.

Answer: B
